

Golf Academy Frequently Asked Questions

What is the Nemacolin Golf Academy Teaching Philosophy?

Golf swings are like snow flakes: no two are alike. Nor do they have to be. There are an infinite variety of ways to SWING THE GOLF CLUB and hit good shots. So we believe that no two lessons should be alike either. All of our instruction is tailored to your individual needs, and we see no reason to put everyone into a mold. We are a method-free, impact based Golf Academy looking to find what is right FOR YOU!

Will the instructor tear down my swing and start from scratch?

Absolutely Not!!! Two reasons: A) You are probably doing some things correctly right now, and B) it is all but impossible to start from scratch if you have been playing even a little while. All we do is match up the components of your motion to apply the golf club more correctly to the golf ball. "Nobody ever hit the ball with their backswing"--Dennis Clark

What is TrackMan™?

TrackMan™ is the latest in radar based technology which tracks the following: Club head speed, ball speed, launch angle, spin rate, landing angle, spin axis, swing plane, swing direction, attack angle, swing path and more---ALL IN ONE SWING! It is the technology used by the all the major golf tours around the world, and is now available for your game at our academy!

Is TrackMan™ only for good players?

NO! While it is true that more advanced golfers may get a greater benefit due to their higher skill level, TrackMan™ can help anyone. Who doesn't want to know how far you hit every club in your bag? Or get a graphic of your actual club path into the golf ball?

Should I take a playing lesson on the course with the pro, or a lesson on the practice tee?

Again, your call but we have found that playing lessons (on course) are a much greater benefit to the more advanced player. The course lesson is designed much more for course management, for the player who can already strike the ball fairly consistently. If you are having trouble with your swing, your time with the pro may be better spent on the lesson tee.

What do the half-day sessions include?

These are 3-hour sessions with a little bit of everything for your game. Full swing, chipping, putting etc. The instructor will decide where you need the most work and direct the session from there. A great "tune up"!

Does the Academy offer Club Fittings?

We do club fittings as part of an overall lesson program. We want to be sure the equipment is compatible with any swing corrections that you may need. Our method is superior to a "compensation" fit that offers a loft or lie angle adjustment to simply "band-aid" an existing flaw. We will be sure your swing AND your new clubs are right for you. We have both the Nike 360 Fitting System and the TrackMan™ Radar technology to test a variety of driver shafts, heads, iron lengths, lie angles etc, to determine exactly what golf club specification are right for you. This is a MUST for anyone considering new equipment.

Does the golf academy offer group clinics?

Absolutely! We have two different kinds: A *Demonstration Clinic* where the Professional will demonstrate various swing techniques and answer your questions about problems you are having and a *Participation Clinic* where your group will get a short opening clinic by the professional, followed by 75 minutes of group instruction where you hit balls.
